# Contents

1. The road towards a W3C Working Group
2. Scope of the WG
3. Timeline of the WG
4. Participating in a W3C WG
5. Call for contributions

# The road towards a W3C Working Group

# The road towards a W3C Working Group

- Solid specification has been incubated in a W3C Community Group so far
  - CG was officially launched in late 2018
- Community Groups within W3C
  - Meant for incubation of new specification work
  - Lightweight process
  - Outputs are CG reports, not formal recommendations
- Once sufficient interest is observed and incubated solutions mature
  - W3C team takes initiative to form WG or IG
  - These groups are formally recognized within the [W3C process](#)

# The road towards a W3C Working Group

- A first charter for a Solid WG was proposed in late 2023
- Proposals are put forward for review
- **Horizontal review:** Accessibility, Architecture, i18n, Privacy, Security
- **AC review:** W3C membership gets to vote or (formally) object to a charter, note or recommendation

# The road towards a W3C Working Group

- The Solid WG charter received a number of formal objections
  - Thus, the initial proposal was not adopted and the working group was not formed
- Formal objections on
  - Solution-oriented approach of the WG charter, rather than defining the problem space
  - Selection of chairs
  - Limited number of implementations (rubber stamping)
  - Description of deliverables and dependencies

# The road towards a W3C Working Group

- **Early 2024:** W3C council on formal objections
  - Council approves efforts to update charter
- Name change
  - Working title: “PUMPKIN WG” (<-> RDF)
  - New name [decided by Solid community](#): “Linked Web Storage”
- [Explainer of the protocol](#)
- **June 2024:** Horizontal Review of updated charter
  - Additional chair: Eric Prud’hommeaux
  - Updated deliverables and dependencies
  - Problem-oriented scope
- **August/September 2024:** AC Review
- **September 2024:** Approval of the W3C AC
- **October 2024:** Start of the WG

# Composition of the Working Group

## Chairs

Aaron Coburn (Inrupt)

Eric Prud'hommeaux (Invited Expert)

Laurens Debackere (Digitaal Vlaanderen)

## W3C Team Contact

Pierre-Antoine Champin

## Participating Organizations

[British Broadcasting Corporation](#) , [Digitaal Vlaanderen](#) , [Electronics and Telecommunications Research Institute \(ETRI\)](#) , [Forschungszentrum Informatik \(FZI\)](#) , [HM Government](#) , [imec](#) , [Inrupt Inc.](#) , [Institut Mines-Télécom](#) , [Institut National de Recherche en Informatique et en Automatique \(Inria\)](#) , [OpenLink Software Inc.](#) , [Protocol Labs](#) , [Startin'blox](#) , [Stony Brook University](#) , [Universidad Politécnica de Madrid](#) , [University of Oxford](#) ,

# Scope of the Linked Web Storage WG

*Enabling the **development** of web applications where **data storage, entity authentication, access control, and application provider** are all loosely coupled, as opposed to the web of today where these are typically all tightly coupled and changing one requires changing all, sometimes at the price of all past data.*

- Output of WG will be an **LWS Protocol** at **Recommendation** level
  - **Secure and permissioned access to externally stored data in an interoperable way.**
  - **Recommendation:** Endorsement of W3C and its Members. **Standard for the Web.**
- Other dependencies **could** be defined by the LWS WG at Recommendation level if deemed necessary

# Scope of the Linked Web Storage WG

*Enabling the **development** of web applications where **data storage, entity authentication, access control, and application provider** are all loosely coupled, as opposed to the web of today where these are typically all tightly coupled and changing one requires changing all, sometimes at the price of all past data.*

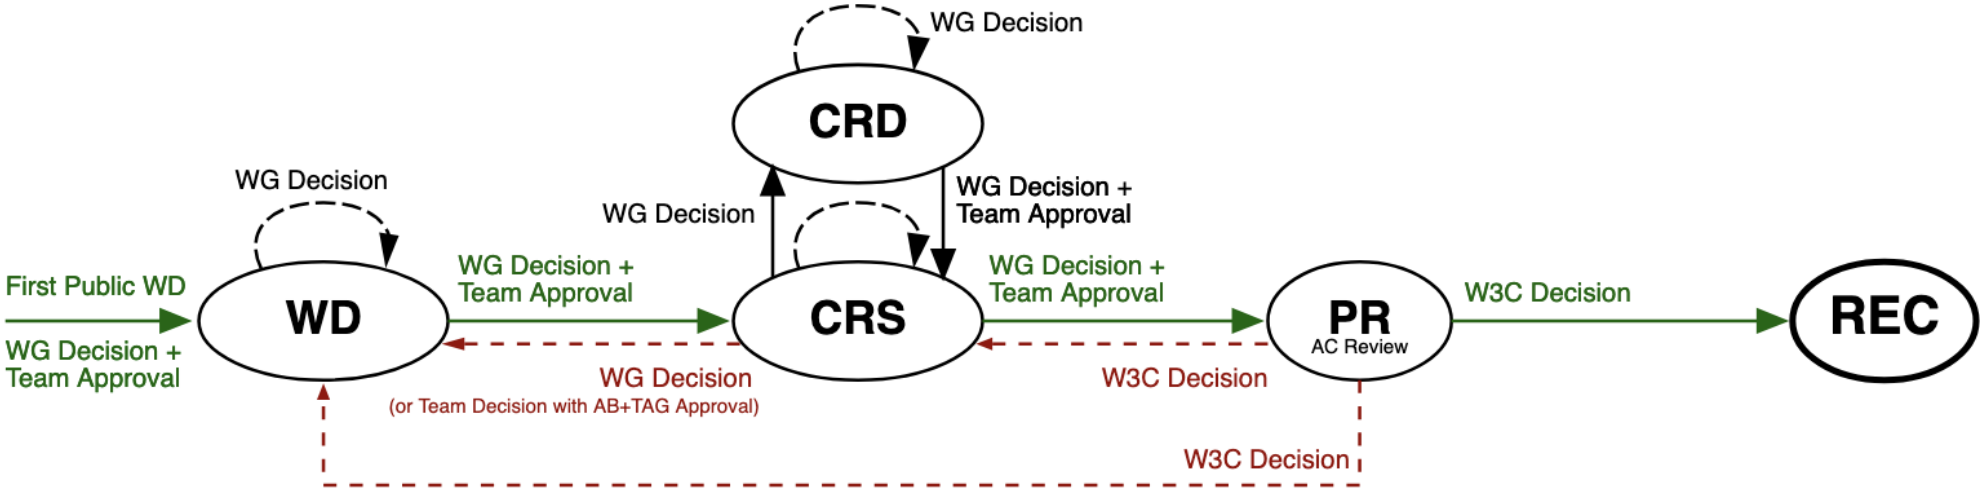

- Non-normative deliverables
  - Test suite and implementation report
    - At least 2 interoperable implementations of the protocol
  - Linked Web Storage threat model

# Timeline of the LWS Working Group (so far)

- **October 2024 – January 2025:** Use Cases and Requirements WG Note
  - Working group note to formalize scope
  - Collect, refine and prioritize use cases
  - Distill requirements and adopt them in specification
- **January 2025:** Work on LWS protocol starts
  - And dependencies which have no normative (RFC/REC-level) specification
  - Refinement of input documents based on requirements

# Timeline of the LWS Working Group

# Timeline of the LWS Working Group

Note: The group will document significant changes from this initial schedule on the group home page.

<b>Specification</b>	<b><u>FPWD</u></b>	<b><u>CR</u></b>	<b><u>PR</u></b>	<b><u>Rec</u></b>
<b>Linked Web Storage Protocol</b>	<i>2025-03-11</i>	<i>2026-03-10</i>	<i>2026-06-09</i>	<i>2026-09-08</i>

# Participating in a W3C WG

- Typically limited to W3C Members (= Organizations)
  - [W3C Membership fees](#) vary based on revenue, type of organization and location.
- Individuals can join the WG as invited expert
  - Invited Experts whose specialized knowledge addresses areas where current members' expertise is lacking or insufficient.
  - Invited Experts should demonstrate previous involvement in the problem space.
  - No fee, but requires a formal approval from the W3C team and WG chairs.

# Participating in a W3C WG

- Some parts of the Working Group's work are open to the entire community
  - **LWS Use Cases** - [github.com/w3c/lws-ucs](https://github.com/w3c/lws-ucs)
    - Open for everyone to propose their use cases or user stories
  - **Mailing list** - [lists.w3.org/Archives/Public/public-lws-wg/](https://lists.w3.org/Archives/Public/public-lws-wg/)

# Call for contributions

- Join the LWS WG if you are a W3C Member
  - If not, contact Marie-Claire Forgue at W3C for more information ([mcf@w3.org](mailto:mcf@w3.org))
- Request to join the WG as Invited Expert
  - If you feel that your expertise as an individual might be valuable
- **Propose your use cases and user stories (!!)**
  - [github.com/w3c/lws-ucs](https://github.com/w3c/lws-ucs)

# Thank you for joining!
