Objective

SecuWeb aims to **strengthen data security** in companies and organisations in Wallonia, France and Flanders.

The project investigates how innovative technologies such as **Solid, Blockchain, Quantum Internet, 5G, AI** and **IoT** can contribute to safer data use.

Through **demonstrators and use cases**, we share knowledge and explore how to implement these technologies in companies and organisations.

In the sectors   E-health
                  Industry 4.0
                  Mobility
                  Food

Valorisation

Activities to inform, inspire and raise awareness among companies and organisations about safe data use.

Implementation

Develop use cases together with companies and organisations from the e-health, industry 4.0, mobility and food sectors to show how these technologies can be deployed in their business or organisation.
